

Validation: the estimator recovers known geometry, is invariant to dead channels, and the body beats linear denoising

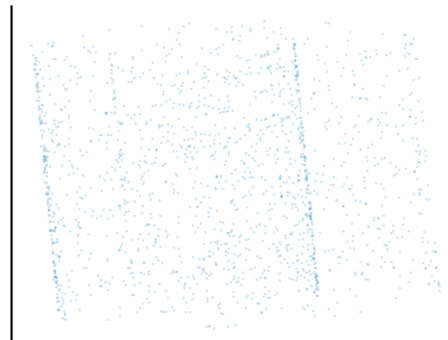

a flat 2-plane
dim=2.06

b 2-sphere R=1
dim=1.99

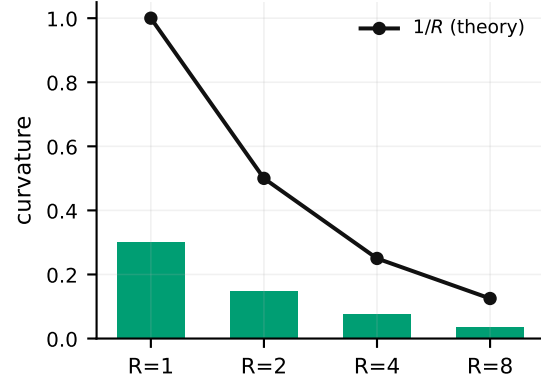

c Swiss roll
dim=1.97

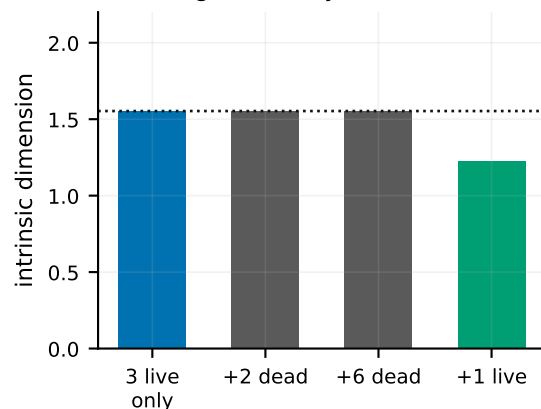

d slotted sheet
dim=0.42

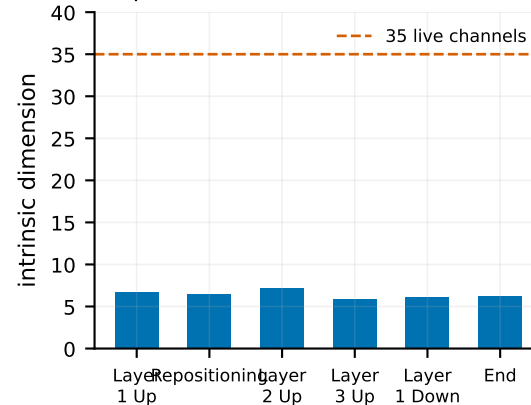

e curvature scales as 1/R

f dead channels do not change the body

g dimension by machining phase (CNC)

h body as prior beats linear by ~33%
